Aircraft event management — without the hassle.

Spider Events allows operators to report specific aircraft or equipment events in real-time.

WHAT IS SPIDER EVENTS?

Spider Events is an event management solution for operators who need accurate reporting of specific actions taken by their aircraft. With the introduction of the Universal Aircraft Interface (UAI) on the Spider 8, we can now detect and report up to four discrete inputs or outputs through the Spider from anywhere in the world.

- ✓ Engine on and off
- ✓ Takeoff and landing
- ✓ Collective up and down
- ✓ Firefighting specific events (bucket Open and closed etc)

WHAT IT COSTS

For **US \$299** per aircraft per month you get:

- | | |
|--------------------------|----------------------------|
| Spider 8 hardware | Unlimited Event Reporting |
| Unlimited tracking | Core Spidertracks Features |
| Unlimited Communications | |

WHAT ARE THE BENEFITS?

- ✓ No capital outlay
- ✓ No depreciating assets
- ✓ Full-service warranty covering any costs of after-sales service
- ✓ Pooled allowances of ATaaS hours across all subscribed aircraft
- ✓ Unlimited access to real-time and historic data at two minute intervals
- ✓ Unlimited access to real-time and historic data at two minute intervals
- ✓ Unlimited access to the Spidertracks Emergency Management Framework
- ✓ Contract compliance
